Automated data analysis report for a dataset with 2,000 rows and 21 columns.

1. Dataset Overview

2,000	21	3	18	0.0%	0	100/100
Total Records	Columns	Numeric	Categorical	Missing %	Duplicates	Quality Score

2. Data Quality Report

Column	Type	Missing	Unique Values	Status
customerID	str	0 (0.0%)	2000	Clean
gender	str	0 (0.0%)	2	Clean
SeniorCitizen	int64	0 (0.0%)	2	Clean
Partner	str	0 (0.0%)	2	Clean
Dependents	str	0 (0.0%)	2	Clean
tenure	int64	0 (0.0%)	73	Clean
PhoneService	str	0 (0.0%)	2	Clean
MultipleLines	str	0 (0.0%)	3	Clean
InternetService	str	0 (0.0%)	3	Clean
OnlineSecurity	str	0 (0.0%)	3	Clean
OnlineBackup	str	0 (0.0%)	3	Clean
DeviceProtection	str	0 (0.0%)	3	Clean
TechSupport	str	0 (0.0%)	3	Clean
StreamingTV	str	0 (0.0%)	3	Clean
StreamingMovies	str	0 (0.0%)	3	Clean
Contract	str	0 (0.0%)	3	Clean

Column	Type	Missing	Unique Values	Status
PaperlessBilling	str	0 (0.0%)	2	Clean
PaymentMethod	str	0 (0.0%)	4	Clean
MonthlyCharges	float64	0 (0.0%)	1806	Clean
TotalCharges	float64	0 (0.0%)	1997	Clean
Churn	str	0 (0.0%)	2	Clean

3. Statistical Summary

Column	Mean	Median	Std Dev	Min	Max	Skew	Outliers
tenure	36.37	36.00	21.18	0.00	72.00	0.01	0
MonthlyCharges	67.63	67.45	29.16	18.01	119.97	0.05	0
TotalCharges	2.5K	2.0K	1.9K	1.61	8.6K	0.86	18

4. Correlation Analysis

Column A	Column B	r	Strength	Direction
tenure	TotalCharges	0.754	Strong	Positive
MonthlyCharges	TotalCharges	0.56	Moderate	Positive
tenure	MonthlyCharges	-0.01	Weak	Negative

5. Decision Support Summary

90/100	High	0	0	1
Readiness Score	Readiness Level	Immediate Actions	Risks	Opportunities

Watch List

- **Outliers in 1 Column(s)**

  Columns: TotalCharges (18). Investigate whether these are data errors or valid extremes. Consider capping/winsorizing if they distort your model.

- **High Cardinality Columns**
  customerID (2000 values). These may be ID fields or free text. Consider target encoding, frequency encoding, or dropping for modeling.

Opportunities

- **Clean Dataset — Ready for Analysis**
  Only 0.0% missing. Dataset is well-formed and suitable for direct modeling or reporting.
